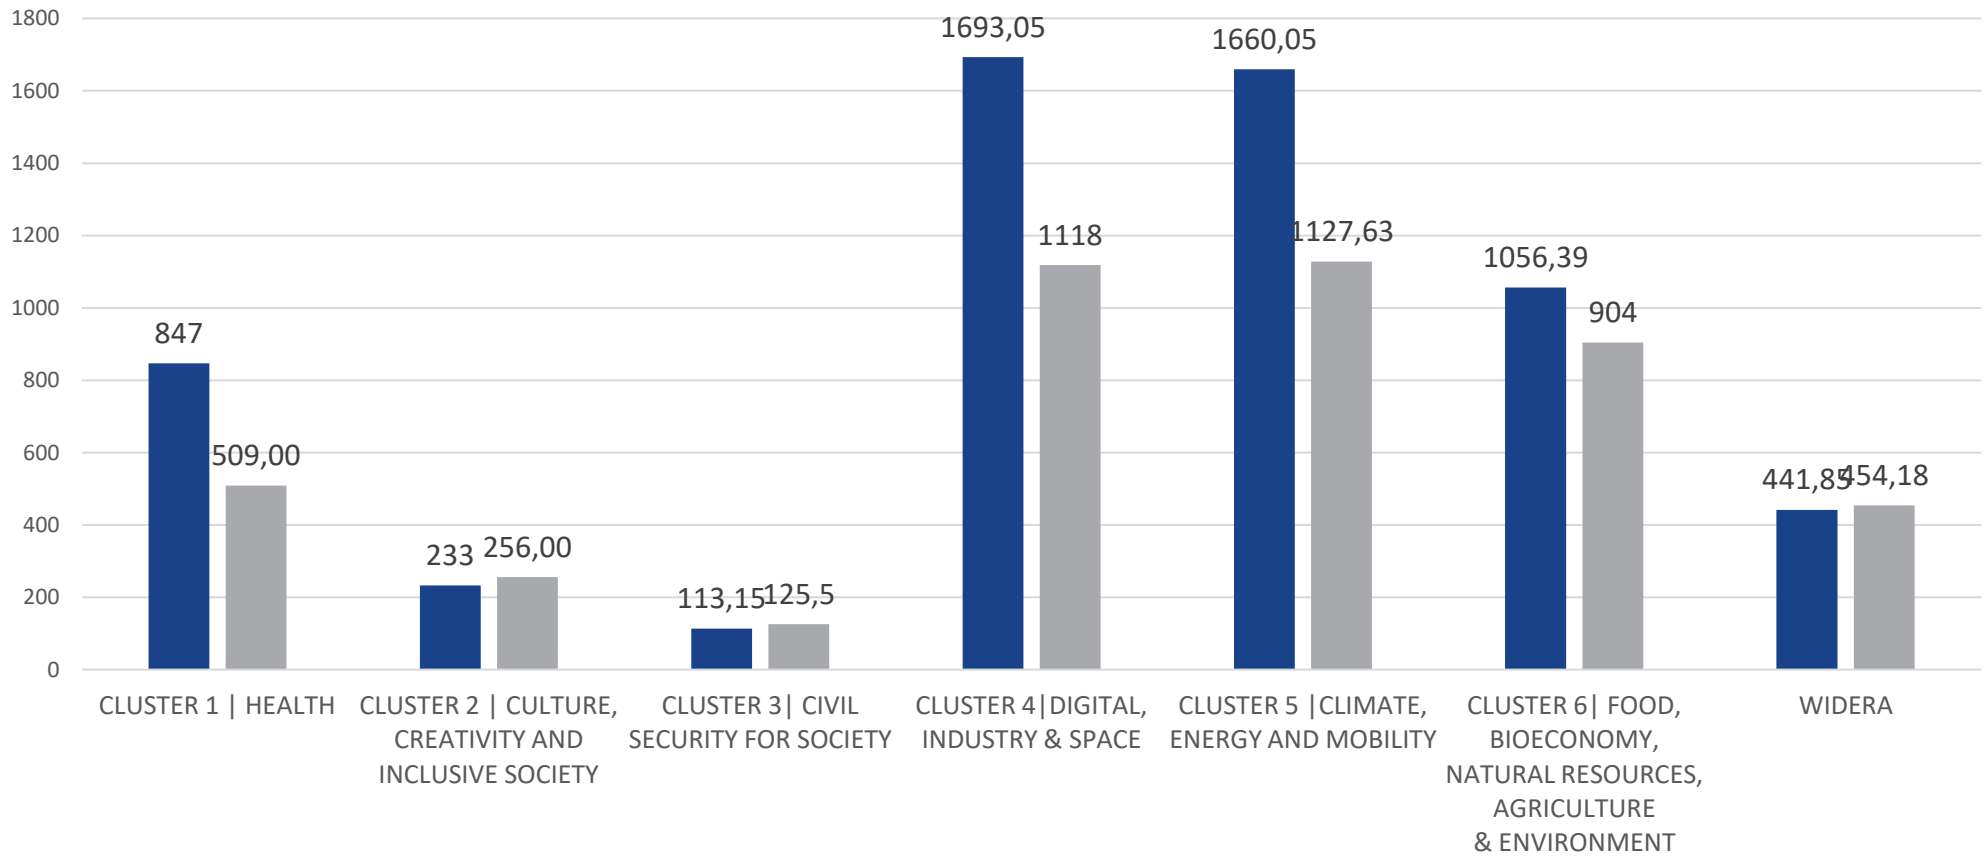
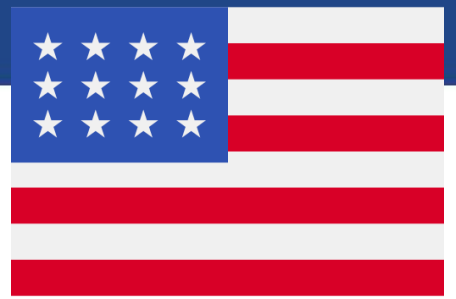
PILLAR II – BUDGET 2023-2024 (mln €)

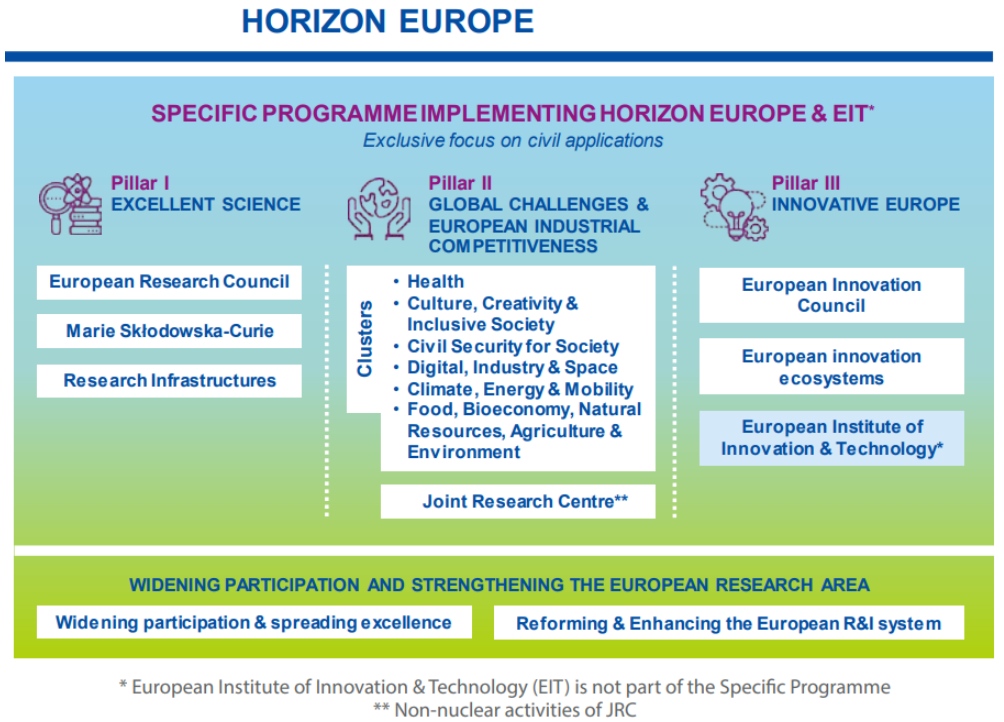


Cluster 1. Health | Opportunities for US Research



- The US is the EU's main partner when it comes to health research either in terms of numbers of US participation in the Framework Programme (both FP7 & Horizon 2020) projects.
- Even if the US is a Third Country not yet associated with the Horizon Europe Programme, **eligibility for EU funding is granted for US participants only under the Cluster "Health"** (Pillar 2) of Horizon Europe. Within the Work Programme Health in fact (page 8), this EU-US agreement is mentioned as follows:

In recognition of the opening of the US National Institutes of Health's programmes *to European researchers, any legal entity established in the United States of America is eligible to receive Union funding to support its participation in projects funded under the Health cluster.*



* European Institute of Innovation & Technology (EIT) is not part of the Specific Programme
** Non-nuclear activities of JRC

Not valid for topics under Mission on Cancer

Upcoming! 13/11/2023

HNN3.0 | Webinar on the Annotated Horizon Europe template "Information on Clinical Studies"

Date
13.11.2023 (10:00) - 13.11.2023 (11:30)

Online - Save the date

The HNN 3.0 network is organizing a webinar on the annotated Horizon Europe template "Information on Clinical Studies" together with the European Commission.

This template "Information on Clinical Studies" needs to be filled out for every Horizon Europe application, if clinical studies are planned within the project. The annotated template was prepared by the HNN 3.0 network and is intended to support applicants and Health NCPs in filling out the template and to provide information and tips.

During the webinar the annotated template will be presented in detail and an overview will be given of which other helpful supporting tools the HNN 3.0 network has been prepared. Questions will be answered by Jan Paehler from the European Commission and HNN 3.0 Health NCPs.

Agenda of the Webinar

HNN3.0 HEALTH-NCP-NET

HEALTH NCP NET 3.0
Webinar: Annotated Horizon Europe Template
"Information on Clinical Studies"

13. November 2023, 10:00 – 11:30 CET
online

10:00 – 10:30	**Welcome and introduction**
Welcome by HNN 3.0	
Welcome by EC *Jan Paehler, European Commission*	
Overview of HNN 3.0 Tools *Lydia Kammler, Cluster 1 NCP, Germany*	
10:30 – 11:30	**Annotated Horizon Europe Template "Information on Clinical Studies"**
Annotated Horizon Europe Template "Information on Clinical Studies" *Uta Baddack-Werncke, Cluster 1 NCP, Germany* *Sylvia Balz, Cluster 1 NCP, Germany*	
Question & Answer *Cluster 1 NCPs* *Jan Paehler, European Commission*	
Closing Remarks	
End of the webinar	

Registration will close 09 November 2023 | REGISTRATI QUI

HNN3.0
HEALTH-NCP-NET

This document aims to guide Horizon Europe applicants in finding potential partners especially under the Health Cluster of the Programme, by providing them with tips on "how to get noticed", how to choose the right channels to reach the right partners, and how to advertise at best their own expertise and background for R&I cooperation.

HNN3.0
HEALTH-NCP-NET

Health-NCP-Net 3.0 (HNN 3.0) is a network that facilitates trans-national cooperation between National Contact Points (NCPs) for Cluster 1 "Health" (CL1) with a view to identifying and sharing good practices and raising the general standard of support to potential applicants of Horizon Europe in the Health sector. We aim to help CL1 NCPs in their daily work and support easier access to Horizon Europe calls. Our services are tailormade to the needs of NCP colleagues and are free of charge. However, several HNN3.0 products and activities are also directly addressed to Horizon Europe Applicants. Find out more about our Services.

The HNN3.0 Consortium consists of 16 NCP organisations with a balanced representation of experienced and less experienced CL1 NCPs across Europe. Regarding the new disciplines merged into CL1 under Horizon Europe, our consortium includes NCPs with expertise on other Clusters and programmes, the SSH dimension (Social Sciences and Humanities), as well as insider knowledge on the Mission on Cancer and the Health-related EU Partnerships.

General Tips!

HNN3.0
HEALTH-NCP-NET

General tips for partner search and consortium building

- **Start early and get prepared to invest time and efforts!** | As soon as you see a Call for Proposal that could be relevant for you, you should start working to build and consolidate a consortium. This may take time and may need dedicated effort, especially to manage the communication with the different partners during the preparation of your proposal.

- **Make the most from your contacts** | Leveraging on your existing professional and personal contacts and networks may be a good start and can ensure you a first proficient working team to start design the proposal.

- **Know yourself, know your worth** | You will need to be extremely effective in terms of reaching out to potential partners and explaining why you are a good partner for their consortium. By starting from the requirements of the Call for Proposals, highlight and valorise your relevant expertise, previous experience, network of contacts and exploitable research results: *to what extent and how you and your organisation could contribute to the project in terms of skills, expertise, resources, and experience?*

- **Be social!** | Events in your field – especially those in presence - are an excellent place to find partners. So…don't be shy during networking sessions or even coffee breaks: promote yourself, your organisation and your ideas for cooperation!

- **Think beyond sectors…and borders!** | The ability to work in large, multidisciplinary, international projects is well liked and inevitable when building a consortium, especially under Horizon Europe. It can be of great advantage to find partners who already have experience in international cooperation. Likewise, if you have experience in international collaborations, let your potential partners know!

RICH EUROPE

Research Infrastructures NCPs Network Consortium for Horizon Europe

LIFE SCIENCE INFRASTRUCTURES

European Vaccine Research and Development Infrastructure

Category: Life sciences **Type of access:** Transnational **Status:** Continuous

Transnational Access Info:

TRANSVAC2 is the follow-up project to its successful predecessor project TRANSVAC, the European Network of Vaccine Research and Development funded under FP7. The TRANSVAC2 consortium comprises a comprehensive collection of leading European institutions that propose to further advance with the previous initiative towards the establishment of a fully operational and sustainable European vaccine R&D infrastructure. TRANSVAC2 will support innovation for both prophylactic and therapeutic vaccine development based on a disease-overarching and one-health approach, thereby optimising the knowledge and expertise gained during the development of both human and animal vaccines. This will be achieved by bridging the translational gap in biomedical research, and by supporting cooperation between public vaccine R&D institutions of excellence, related initiatives and networks in Europe, and industrial partners. TRANSVAC2 will complement and integrate with existing European research infrastructures in both the public and private sectors. TRANSVAC2 will function as leverage and innovation catalyst between all stakeholders involved in vaccine R&D in Europe and -by providing integrated and overarching vaccine R&D services- will contribute to the development of effective products to address European and global health challenges, to controlling the burden and spread of infectious diseases, and reinforce the economic assets represented by vaccine developers in Europe.

The impact of TRANSVAC2 will be maximised by two external advisory bodies. An independent Scientific & Ethics Advisory Committee will provide recommendations surrounding scientific-technical and ethical issues, whereas the coordination of TRANSVAC2 with other related initiatives and the further promotion of the long-term stability of a European vaccine R&D infrastructure will be supported by a Board of Stakeholders comprising representatives of policy and decision makers, industry associations and European infrastructures.

European Virus Archive GLOBAL

Category: Life sciences **Type of access:** Transnational **Status:** Continuous

Transnational Access Info:

The EU-funded EVA-GLOBAL project gathers 43 laboratories associated with key Non-Governmental Organizations including WHO and OIE. EVA-GLOBAL network is reinforced by 12 Associate Partners and 5 Associate international networks. This unique advanced international community (12 EU and 17 non-EU) aims at becoming the most responsive network to improve the control of emerging or re-emerging virus outbreaks at the global level. The past EVAg, has already been able to play a key role for the control of major virus outbreaks such as MERS, Chik, Zika, Ebola, Dengue, COVID-19 viruses, by the supply of unique reagents for the detection of viruses in infected patients. Through the new institutes joining the consortium, EVA-G will become the largest virtual virus collection for human, animal and plant viruses.
